Vision: To be a premier institute in inclusive and transformative engineering education and research, nurturing innovative and ethical professionals for sustainable societal development.

Mission:

M1-Provide inclusive, learner-centric, and quality engineering education that fosters academic excellence, critical thinking, professional competence, and lifelong learning.

M2 -Promote innovation, research, entrepreneurship, and industry collaboration to develop sustainable solutions and globally competent professionals.

M3 -Develop ethical, socially responsible professionals with leadership qualities through value-based education and community engagement, fostering a lifelong commitment to sustainable development.
