Each topic was further divided into 2 subsections where the first subsection dealt with the concepts and the trainers covered all the important aspects associated with every topic. The second subsection dealt with problem solving of all the major concepts that was covered in the class. As the total training hours is fixed as 15, this was the best strategy as it ensured maximum exposure of topics to the students. The response from students was minimal during the start of the training compared to classroom sessions. But the students towards the end participated unequivocally. We have planned for a quick refresher in the next phase which is planned in March to equip students with concept

reinforcing session. The training program was well appreciated by the students and they gave good feedback about the trainers as well. The attendance of the students are as follows.

- Batch 1 (ECE, EEE, & CSE): 82%
- Batch 2 (ME & CE): 78.5%

The students also requested they need similar training programs covering more topics, so that they can prepare much better for the placement.
