# SEMESTER 5

**COMPUTER SCIENCE AND ENGINEERING** 

## **COMPUTER NETWORKS**

(Common to CS/CD/CM/CR/CA/AD/AI/CB/CN/CU/CI)

| Course Code                     | PCCST501 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:1:0:0  | ESE Marks   | 60             |
| Credits                         | 4        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To introduce the core concepts of computer networking.
- 2. To develop a big picture of the internetworking implementation on Linux-based systems.
- **3.** To impart an overview of network management concepts.

| Module | Syllabus Description  | Contact |
|--------|---|---------|
| No.    | Synabus Description   |         |
| 1      | Overview of the Internet, Protocol layering (Book 1 Ch 1)  Application Layer: Application-Layer Paradigms, Client-server applications - World Wide Web and HTTP, FTP. Electronic Mail, DNS. Peer-to-peer paradigm - P2P Networks, Case study: BitTorrent (Book 1 Ch 2)  | 6       |
| 2      | Transport Layer: Services, Protocols, UDP, TCP (Book 1 Ch 3).  Hands-on: Sockets Introduction, Elementary TCP Sockets, TCP  Client/Server Example, I/O Multiplexing: The select and poll Functions (Book 2 Ch 3 to 6), Elementary UDP Sockets (Book 2 Ch 8), Advanced I/O  Functions (Book 2 Ch 14)  Network Layer: Introduction, Network-layer protocols, Unicast routing, Multicast routing - Multicasting Basics, Intra domain and inter-domain routing, Next generation IP (Book 1 Ch 4), Quality of Service (Book 1 Ch 8)  Hands-on: Linux Kernel Implementation of Routing Table and Caches, Routing Cache Implementation Overview, Adding new entry in the Routing Table using ip command (Book 3 Ch 14) | 18      |

| 3 | Data-Link Layer: Data link control (DLC), Multiple access protocols (MAC), Link-layer addressing, Ethernet protocol, Connecting devices (Book 1 Ch 5) Wireless LANs, Mobile IP (Book 1 Ch 6)  Hands-on: Datalink Provider Interface, SOCK_PACKET and PF_PACKET (Book 2 Ch 29) | 11 |
|---|---|----|
| 4 | SNMP, ASN.1 (Book 1 Ch 9) Physical Layer: Data and signals, Digital transmission, Analog transmission, Bandwidth utilization, Transmission media (Book 1 Ch 7)  | 9  |

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal Examination- 2 (Written) | Total |
|------------|-----------------------------|--|-----------------------------------|-------|
| 5          | 15                          | 10                                     | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

| Part A                       | Part B  | Total |
|------------------------------|---|-------|
| • 2 Questions from each      | Each question carries 9 marks.                    |       |
| module.                      | Two questions will be given from each module, out |       |
| • Total of 8 Questions, each | of which 1 question should be answered.           |       |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60    |
|                              | subdivisions.                                     |       |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |       |

At the end of the course students should be able to:

|     | Course Outcome  | Bloom's<br>Knowledge |
|-----|---|----------------------|
|     |   | Level (KL)           |
| CO1 | Understand the internetworking design in terms of protocol stack and the role of various application layer protocols                                | K2                   |
| CO2 | Illustrate the functions of the transport layer from connectionless and connection-oriented perspectives  | К3                   |
| CO3 | Identify how the network layer achieves host-to-host connectivity and caters to the diverse service requirements of the host applications           | К3                   |
| CO4 | Explain the nuances of the data link layer design and demonstrate the various data link link layer protocols  | К3                   |
| CO5 | Describe the fundamental characteristics of the physical layer and understand how the physical layer supports the functionalities of the top layers | K2                   |

Note: K1-Remember, K2-Understand, K3-Apply, K4-Analyse, K5-Evaluate, K6-Create

## **CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   |     |     |     |     |     |     |     |     |      |      | 3    |
| CO2 | 3   | 2   |     |     |     |     |     |     |     |      |      | 3    |
| CO3 | 3   | 2   |     |     | 2   |     |     |     |     |      |      | 3    |
| CO4 | 3   | 2   |     |     |     |     |     |     |     |      |      | 3    |
| CO5 | 3   |     |     |     |     |     |     |     |     |      |      | 3    |

Note: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

|        |  | Text Books  |                          |                  |
|--------|--|---|--------------------------|------------------|
| Sl. No | Title of the Book  | Name of the Author/s                              | Name of the<br>Publisher | Edition and Year |
| 1      | Computer Networks: A Top-<br>Down Approach                     | Behrouz A Forouzan                                | McGraw Hill              | SIE, 2017        |
| 2      | Unix Network Programming, Volume 1: The Sockets Networking API | W. Richard Stevens, Andrew M. Rudoff, Bill Fenner | Pearson<br>Education     | 3/e, 2004        |
| 3      | TCP/IP Architecture, design, and implementation in Linux       | Sameer Seth  M. Ajaykumar  Venkatesulu            | Wiley                    | 1/e, 2008        |

#### **DESIGN AND ANALYSIS OF ALGORITHMS**

(Common to CS/CD/CM/AM/CB/CN/CU/CG)

| Course Code                     | PCCST502 | CIE Marks   | 40            |
|---------------------------------|----------|-------------|---------------|
| Teaching Hours/Week (L: T:P: R) | 3:1:0:0  | ESE Marks   | 60            |
| Credits                         | 4        | Exam Hours  | 2 Hrs 30 Min. |
| Prerequisites (if any)          | PCCST303 | Course Type | Theory        |

#### **Course Objectives:**

- To gain a foundational understanding of algorithms and their analysis.
- To develop problem-solving skills using various algorithm design paradigms like divide and conquer, dynamic programming, etc.
- To understand the concepts of tractable and intractable problems, and different complexity classes (P, NP, NP-hard, NP-complete).

| Module | Syllabus Description   | Contact |
|--------|--|---------|
| No.    |  | Hours   |
| 1      | Algorithms – Characteristics, Criteria for Analysing Algorithms; Time and Space Complexity - Best, Worst, and Average Case Complexities; Asymptotic Notations and their properties; Time and Space Complexity Calculation of simple algorithms; Analysis of Recursive Algorithms - Recurrence Equations, Solution of Recurrence Equations: Iteration Method, Recursion Tree Method, Substitution method and Master's Theorem (proof not expected); Balanced Search Trees - AVL Trees (Insertion and deletion operations with all rotations in detail, algorithms not expected) | 11      |

| 2 | Disjoint Sets - Disjoint set operations, Union and find algorithms, Analysis of union by rank with path compression, Connected components of a Graph; Graphs – Representations, Traversals : BFS, DFS and their analysis, Strongly Connected Components; Topological Sorting. Divide and Conquer Strategy – Control Abstraction, Merge Sort, Strassen's Matrix Multiplication, Analysis.  | 11 |
|---|---|----|
| 3 | Greedy Strategy - Control Abstraction, Fractional Knapsack; Minimum  Cost Spanning Tree - Kruskal's and Prim's, Analysis; Shortest Path  Problem - Dijkstra's Algorithm, Analysis; Dynamic Programming -  Control Abstraction, Optimality Principle, Matrix Chain Multiplication,  Analysis; All Pairs Shortest Path Algorithm - Floyd-Warshall Algorithm,  Analysis; Backtracking - Control Abstraction, N - Queens Problem,  Algorithm.     | 11 |
| 4 | Branch and Bound - Control Abstraction, Travelling Salesman Problem, Algorithm; Complexity - Tractable and Intractable Problems; Complexity Classes: P, NP, NP- Hard and NP-Complete Classes; NP Completeness proof - Clique Problem and Vertex Cover Problem; Approximation algorithms - Bin Packing; Randomized Algorithms - Definitions of Monte Carlo and Las Vegas algorithms; Randomized version of Quick Sort algorithm with analysis. | 11 |

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written ) | Total |
|------------|-----------------------------|--|--|-------|
| 5          | 15                          | 10                                     | 10                                       | 40    |

## **End Semester Examination Marks (ESE)**

| Part A   | Part B  | Total     |
|--|---|-----------|
| • 2 Questions from each  | Each question carries 9 marks.                    |           |
| module.  | Two questions will be given from each module, out |           |
| • Total of 8 Questions, each of which 1 question should be answered. |   | <b>60</b> |
| carrying 3 marks   | • Each question can have a maximum of 3           | 60        |
|  | subdivisions.                                     |           |
| (8x3 =24 marks)  | (4x9 = 36  marks)                                 |           |

At the end of the course students should be able to:

|         | Course Outcome  | Bloom's<br>Knowledge |
|---------|---|----------------------|
| CO1     | Analyze any given algorithm and express its time and space complexities in asymptotic notations.  | Level (KL) K4        |
| CO2     | Solve the recurrence equations using Iteration, Recurrence Tree, Substitution and Master's Method to compute time complexity of algorithms. | К3                   |
| CO3     | Illustrate the operations of advanced data structures like AVL trees and Disjoint sets.   | КЗ                   |
| CO4     | Illustrate the representation, traversal and different operations on Graphs.  | К3                   |
| CO5     | Demonstrate Divide-and-conquer, Greedy Strategy, Dynamic programming, Branch-and Bound and Backtracking algorithm design techniques.        | K2                   |
| CO6     | Classify a problem as computationally tractable or intractable, and discuss strategies to address intractability.                           | K4                   |
| Note: K | K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluat   | te, K6- Create       |

**CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

## **MACHINE LEARNING**

(Common to CS/AD/CR/CA/CC/CD)

| Course Code                     | PCCST503 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60             |
| Credits                         | 3        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To impart the fundamentals principles of machine learning in computer and science.
- **2.** To provide an understanding of the concepts and algorithms of supervised and unsupervised learning.

| Module | Syllabus Description  | Contact |
|--------|---|---------|
| No.    | Synabus Description   |         |
|        | Introduction to ML:-  |         |
|        | Machine Learning vs. Traditional Programming, Machine learning            |         |
|        | paradigms - supervised, semi-supervised, unsupervised, reinforcement      |         |
|        | learning.   |         |
|        | Parameter Estimation - Maximum likelihood estimation (MLE) and            |         |
| 1      | maximum aposteriori estimation (MAP), Bayesian formulation.               | 9       |
| 1      | Supervised Learning :-  | ,       |
|        | Feature Representation and Problem Formulation, Role of loss functions    |         |
|        | and optimization  |         |
|        | Regression - Linear regression with one variable, Linear regression with  |         |
|        | multiple variables : solution using gradient descent algorithm and matrix |         |
|        | method.   |         |
| 2      | Classification - Logistic regression, Naïve Bayes, KNN, Decision Trees -  | 9       |
| Z      | ID3   |         |

|   | Generalisation and Overfitting - Idea of overfitting, LASSO and RIDGE        |   |
|---|--|---|
|   | regularization, Idea of Training, Testing, Validation                        |   |
|   | Evaluation measures - Classification - Precision, Recall, Accuracy, F-       |   |
|   | Measure, Receiver Operating Characteristic Curve(ROC), Area Under            |   |
|   | Curve (AUC).   |   |
|   | Regression - Mean Absolute Error (MAE), Root Mean Squared Error              |   |
|   | (RMSE), R Squared/Coefficient of Determination.                              |   |
|   | SVM - Linear SVM, Idea of Hyperplane, Maximum Margin Hyperplane,             |   |
|   | Non-linear SVM, Kernels for learning non-linear functions                    |   |
| 3 | Neural Networks (NN) - Perceptron, Neural Network - Multilayer feed-         | 9 |
|   | forward network, Activation functions (Sigmoid, ReLU, Tanh), Back            |   |
|   | propagation algorithm.   |   |
|   | Unsupervised Learning  |   |
|   | Clustering - Similarity measures, Hierarchical Clustering - Agglomerative    |   |
|   | Clustering, partitional clustering, K-means clustering                       |   |
|   |  |   |
| 4 | Dimensionality reduction - Principal Component Analysis, Multidimensional    | 9 |
|   | scaling  |   |
|   | Ensemble methods - bagging, boosting; Resampling methods -                   |   |
|   | Bootstrapping, Cross Validation. Practical aspects - Bias-Variance tradeoff. |   |
|   |  |   |

(CIE: 40 marks, ESE: 60 marks)

#### **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal Examination-1 (Written) | Internal Examination- 2 (Written) | Total |
|------------|--------------------------|----------------------------------|-----------------------------------|-------|
| 5          | 15                       | 10                               | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

| Part A                       | Part B  | Total |
|------------------------------|---|-------|
| • 2 Questions from each      | Each question carries 9 marks.                    |       |
| module.                      | Two questions will be given from each module, out |       |
| • Total of 8 Questions, each | of which 1 question should be answered.           | (0    |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60    |
|                              | subdivisions.                                     |       |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |       |

At the end of the course students should be able to:

|     | Course Outcome  | Bloom's<br>Knowledge<br>Level (KL) |
|-----|---|------------------------------------|
| CO1 | Illustrate Machine Learning concepts and basic parameter estimation methods.    | К2                                 |
| CO2 | Demonstrate supervised learning concepts (regression, classification).          | К3                                 |
| CO3 | Illustrate the concepts of Multilayer neural network and Decision trees         | К3                                 |
| CO4 | Describe unsupervised learning concepts and dimensionality reduction techniques | К3                                 |
| CO5 | Use appropriate performance measures to evaluate machine learning models        | К3                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

## **MICROCONTROLLERS**

(Common to CS/CC)

| Course Code                   | PBCST504 | CIE Marks   | 60             |
|-------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L:T:P:R) | 3:0:0:1  | ESE Marks   | 40             |
| Credits                       | 4        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)        | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To introduce the ARM architecture and ARM-based microcontroller architecture.
- **2.** To impart knowledge on the hardware and software components to develop embedded systems using STM32 microcontrollers.

| Module<br>No. | Syllabus Description   |    |  |
|---------------|--|----|--|
| 1             | Introduction to ARM Cortex-M Architecture:-  Overview of Embedded Systems, Applications of Embedded Systems, Introduction to Embedded C, Microcontrollers vs. Microprocessors, Classification of processors, Overview of ARM Cortex-M Series, Introduction to the Cortex-M23 and Cortex-M33 processors and the Armv8-mArchitecture, ARM Core Features: Registers, Memory, and Bus Architecture, Comparison with previous generations of Cortex-M processors.   | 9  |  |
| 2             | STM32 Microcontroller Overview and Peripheral Programming:-  Introduction to STM32 Family, STM32U575 Features and Specifications, Power Management and Low-Power Features Libraries, Introduction to Integrated Development Environment and HAL, Writing, and Debugging Your First Program(LED Interfacing), Interfacing Seven-Segment Display, LCD Display, and Matrix Keypad, Relay Interfacing, Analog to Digital Conversion: Potentiometer, temperature sensor, LDR, Microphone, Digital to Analog Conversion: Simple DAC Output Generation, Generating a Sine Wave, Audio | 11 |  |

|   | Signal Generation, Interrupt Handling, Timer and Counter Applications: Basic |    |
|---|--|----|
|   | Timer Configuration, Timers as Counters, Timer-Based Real-Time Clock         |    |
|   | (RTC)  |    |
|   | Communication Protocols and USB:-  |    |
|   | Communication Protocols and USB:-  |    |
|   | Serial port terminal Application, Serial communication (USART, I2C, SPI,     |    |
|   | CAN), Interfacing an I2C Temperature Sensor and Displaying Data on an LCD,   |    |
| 3 | writing to and Reading from an SPI-based EEPROM, Configuring and             | 10 |
|   | Implementing CAN Communication between Multiple STM32U575                    |    |
|   | Microcontrollers, Creating a USB HID Device for Keyboard / Mouse             |    |
|   | Emulation  |    |
|   | LTW: L C IPTOS   |    |
|   | IoT, Wireless Communication, and RTOS:-                                      |    |
|   | Introduction to IoT, IoT Architecture, Protocols (MQTT, CoAP), IoT Security  |    |
|   | Principles and Common Threats Wireless Communication: Interfacing GSM        |    |
|   | (Call, SMS, Internet), Bluetooth Communication Basics, LoRa Communication    |    |
|   | Basics and Applications, Designing an IoT-Based Home Automation System,      |    |
|   | Introduction to RTOS Concepts, FreeRTOS with STM32: Task Creation,           |    |
| 4 | Scheduling, and Management, RTOS Timers, Delays, and RTC Integration,        | 14 |
|   | Inter-task Communication: Queues and Semaphores                              |    |
|   | Trust Zone Technology: Introduction to ARM Trust Zone, Trust Zone            |    |
|   | Architecture and Features, Secure and Non-Secure Worlds: Configuration and   |    |
|   | Management, Implementing Trust Zone in STM32U575, Advanced Debugging         |    |
|   | and Optimization: Code and Memory Optimization Techniques, Debugging         |    |
|   | Strategies and Tools   |    |
|   | Strategies and 100is   |    |

## **Suggestion on Project Topics**

• Identify real world problems requiring hardware solutions and develop them using peripheral devices. Some of the examples would be - Home automation, Small home/office security system, ARM based voice response system etc.

(CIE: 60 marks, ESE: 40 marks)

#### **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Project | Internal Ex-1 | Internal Ex-2 | Total |
|------------|---------|---------------|---------------|-------|
| 5          | 30      | 12.5          | 12.5          | 60    |

## **End Semester Examination Marks (ESE)**

In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions

| Part A                  | Part B  | Total |
|-------------------------|---|-------|
| 2 Questions from each   | 2 questions will be given from each module, out of  |       |
| module.                 | which 1 question should be answered. Each question  |       |
| • Total of 8 Questions, | can have a maximum of 2 subdivisions. Each question | 40    |
| each carrying 2 marks   | carries 6 marks.                                    |       |
| (8x2 =16 marks)         | (8x2 = 16  marks) $(4x6 = 24  marks)$               |       |

#### **Course Outcomes (COs)**

At the end of the course students should be able to:

|     | Course Outcome   | Bloom's<br>Knowledge<br>Level (KL) |
|-----|--|------------------------------------|
| CO1 | Explain the architectural features and instructions of the ARM microcontrollers.                 | K2                                 |
| CO2 | Develop applications involving interfacing of external devices and I/O with ARM microcontroller. | К3                                 |
| CO3 | Use various communication protocols of interaction with peer devices and peripherals.            | К3                                 |
| CO4 | Demonstrate the use of a real time operating system in embedded system applications.             | К3                                 |
| CO5 | Apply hardware security features of ARM in real world applications.                              | К3                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

# **CO-PO Mapping Table:**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|

## Assessment and Evaluation for Project Activity

|  | Allotted  |
|--|---|
|  | Marks   |
| Project Planning and Proposal  | 5   |
| Contribution in Progress Presentations and Question Answer<br>Sessions | 4   |
| Involvement in the project work and Team Work                          | 3   |
| Execution and Implementation   | 10  |
| Final Presentations  | 5   |
| Project Quality, Innovation and Creativity                             | 3   |
| Total  | 30  |
|  | Contribution in Progress Presentations and Question Answer Sessions  Involvement in the project work and Team Work  Execution and Implementation  Final Presentations  Project Quality, Innovation and Creativity |

#### 1. Project Planning and Proposal (5 Marks)

- Clarity and feasibility of the project plan
- Research and background understanding
- Defined objectives and methodology

#### 2. Contribution in Progress Presentation and Question Answer Sessions (4 Marks)

- Individual contribution to the presentation
- Effectiveness in answering questions and handling feedback

#### 3. Involvement in the Project Work and Team Work (3 Marks)

- Active participation and individual contribution
- Teamwork and collaboration

#### 4. Execution and Implementation (10 Marks)

- Adherence to the project timeline and milestones
- Application of theoretical knowledge and problem-solving
- Final Result

#### 5. Final Presentation (5 Marks)

- Quality and clarity of the overall presentation
- Individual contribution to the presentation
- Effectiveness in answering questions

## 6. Project Quality, Innovation, and Creativity (3 Marks)

- Overall quality and technical excellence of the project
- Innovation and originality in the project

Creativity in solutions and approaches

## SOFTWARE PROJECT MANAGEMENT

(Common CS/CD/CM/CR/CA/AD/AM)

| Course Code                     | PECST521 | CIE Marks   | 40           |
|---------------------------------|----------|-------------|--------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60           |
| Credits                         | 3        | Exam Hours  | 2 Hr.30 Min. |
| Prerequisites (if any)          | PECST411 | Course Type | Theory       |

## **Course Objectives:**

- 1. To learn the techniques to effectively plan, manage, execute, and control projects within time and cost targets with a focus on Information Technology and Service Sector.
- 2. To learn agile project management techniques such as Scrum and DevOps.

| Module<br>No. | Syllabus Description   |   |  |  |
|---------------|--|---|--|--|
| 1             | Project scheduling and feasibility study: - Project Overview and Feasibility Studies - Identification, Market and Demand Analysis, Project Cost Estimate, Financial Appraisal; Project Scheduling - Project Scheduling, Introduction to PERT and CPM, Critical Path Calculation, Precedence Relationship, Difference between PERT and CPM, Float Calculation and its importance, Cost reduction by Crashing of activity. | 8 |  |  |
| 2             | Resource Scheduling, Cost Control and Project management Features:- Cost Control and Scheduling - Project Cost Control (PERT/Cost), Resource Scheduling & Resource Levelling; Project Management Features - Risk Analysis, Project Control, Project Audit and Project Termination.   | 8 |  |  |
| 3             | Agile Project Management:  Agile Project Management - Introduction, Agile Principles, Agile methodologies, Relationship between Agile Scrum, Lean, DevOps and IT Service Management (ITIL;. Other Agile Methodologies - Introduction to  | 9 |  |  |

|   | XP, FDD, DSDM, Crystal.  |    |  |  |
|---|--|----|--|--|
|   | Scrum and DevOps in project management :-                                  |    |  |  |
|   | Scrum - Various terminologies used in Scrum (Sprint, product backlog,      |    |  |  |
|   | sprint backlog, sprint review, retro perspective), various roles (Roles in |    |  |  |
| 4 | Scrum), Best practices of Scrum, Case Study; DevOps - Overview and its     |    |  |  |
| 4 | Components, Containerization Using Docker, Managing Source Code and        | 11 |  |  |
|   | Automating Builds, Automated Testing and Test-Driven Development,          |    |  |  |
|   | Continuous Integration, Configuration Management, Continuous               |    |  |  |
|   | Deployment, Automated Monitoring, Case Study.                              |    |  |  |

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal<br>Examination-1<br>(Written) | Internal Examination- 2 (Written) | Total |
|------------|--------------------------|--|-----------------------------------|-------|
| 5          | 15                       | 10                                     | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

| Part A                       | Part B  | Total |
|------------------------------|---|-------|
| • 2 Questions from each      | Each question carries 9 marks.                    |       |
| module.                      | Two questions will be given from each module, out |       |
| • Total of 8 Questions, each | of which 1 question should be answered.           | 60    |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60    |
|                              | subdivisions.                                     |       |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |       |

At the end of the course students should be able to:

|     | Course Outcome  | Bloom's<br>Knowledge<br>Level (KL) |
|-----|---|------------------------------------|
| CO1 | Understand how effectively plan, and schedule projects within time and cost targets | К2                                 |
| CO2 | Apply project estimation and evaluation techniques to real world problem            | К3                                 |
| CO3 | Discuss different Agile Project Methodologies                                       | K2                                 |
| CO4 | Apply various SCRUM practices in project management.                                | К3                                 |
| CO5 | Demonstrate the techniques used in DevOps.  | К3                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

# ARTIFICIAL INTELLIGENCE

| Course Code                     | PECST522 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60             |
| Credits                         | 3        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To lay a solid foundation of the important abstractions, techniques, and reasoning for intelligent systems.
- 2. To enable the learners to understand the basic principles of Reinforcement Learning.

| Module | Syllabus Description   | Contact |  |  |
|--------|--|---------|--|--|
| No.    | Synabus Description  |         |  |  |
| 1      | Introduction to Artificial Intelligence:- Introduction, Foundation and history of AI Agents and Environments; The concept of rationality; The nature of environments, Structure of agents.  Problem solving Agents Well-defined problems and solutions, Formulating problems; Example problems- vacuum world, 8-puzzle, 8-queens.  | 8       |  |  |
| 2      | Searching:- Depth First Search, Breadth First Search, Iterative Deepening Search. Heuristic Search strategies - Heuristic functions, The effect of heuristic accuracy on performance; Generate and test, Greedy best first search, A* algorithm, Constraint satisfaction problems, Adversarial search - Games, Optimal Decision in games, The minimax algorithm, Alpha-beta pruning. | 10      |  |  |
| 3      | Knowledge-Based Agents:- The Wumpus World, Logic, Propositional Logic, Reasoning Patterns in Propositional Logic, First order logic, Inference in first order logic, propositional vs. first order inference, unification & lifts forward chaining, Backward chaining.   | 8       |  |  |

|   | Reinforcement Learning:- Learning from Rewards, Passive Reinforcement    |    |  |  |  |  |  |
|---|--|----|--|--|--|--|--|
| 4 | Learning, Active Reinforcement Learning, Generalization in Reinforcement |    |  |  |  |  |  |
| 4 | Learning, Policy Search, Apprenticeship and Inverse Reinforcement        | 10 |  |  |  |  |  |
|   | Learning, Applications of Reinforcement Learning                         |    |  |  |  |  |  |

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal Examination-1 (Written) | Internal Examination- 2 (Written) | Total |  |
|------------|--------------------------|----------------------------------|-----------------------------------|-------|--|
| 5          | 15                       | 10                               | 10                                | 40    |  |

## **End Semester Examination Marks (ESE)**

| Part A                       | Part B  | Total     |
|------------------------------|---|-----------|
| • 2 Questions from each      | Each question carries 9 marks.                    |           |
| module.                      | Two questions will be given from each module, out |           |
| • Total of 8 Questions, each | of which 1 question should be answered.           | <b>60</b> |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60        |
|                              | subdivisions.                                     |           |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |           |

At the end of the course students should be able to:

|     | Course Outcome  |    |  |  |  |
|-----|---|----|--|--|--|
| CO1 | Explain how intelligent agents can solve problems.  | K2 |  |  |  |
| CO2 | Use the different types of search methods to solve various problems.                                    | К3 |  |  |  |
| CO3 | Formulate knowledge representation and examine resolution in propositional logic and first order logic. | К3 |  |  |  |
| CO4 | Utilize reinforcement learning techniques to create intelligent agents.                                 | К3 |  |  |  |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **DATA ANALYTICS**

| Course Code                     | PECST523 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60             |
| Credits                         | 3        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To help the learner to understand the basic concepts of data analytics.
- **2.** To cover the mathematics for data analytics, predictive and descriptive analytics of data, classification, and clustering & text analytics.
- **3.** To enable the learners to perform data analysis on a real world scenario using appropriate tools.

| Module<br>No. | Syllabus Description  |   |  |  |
|---------------|---|---|--|--|
| 1             | Introduction to Data Analytics:-  Analytics Process Model, Analytical Model Requirements, Data Analytics Life Cycle overview; Association of two variables - Discrete variables, Ordinal and Continuous variable; Probability calculus - probability distributions; Hypothesis Testing - Basic definitions.  Proximity Measures - Data Objects, Attribute types, Dissimilarity and Similarity measures. | 9 |  |  |
| 2             | Association of Two Variables:- Summarizing the Distribution of Two Discrete Variables, Contingency Tables for Discrete Data, Joint, Marginal, and Conditional Frequency Distributions, Graphical Representation of Two Nominal or Ordinal Variables, Measures of Association for Two Discrete Variables,  | 9 |  |  |

|   | Association Between Ordinal and Continuous Variables, Visualization of                        |   |  |  |  |
|---|---|---|--|--|--|
|   | Variables from Different Scales.  |   |  |  |  |
|   | Statistical Description of data - Central tendency, Dispersion, Range,                        |   |  |  |  |
|   | Quartiles, Variance, Standard Deviation, and Interquartile Range.                             |   |  |  |  |
|   | <b>Data Preprocessing</b> - Cleaning, Integration, Reduction, Transformation, Discretization. |   |  |  |  |
| 3 | Mining Frequent Patterns - Associations, Correlations, and Apriori Algorithms.                | 9 |  |  |  |
|   | Classification - General approach to classification, ID3, Attribute                           |   |  |  |  |
|   | selection measures, Naive Bayesian Classification.  |   |  |  |  |
|   | Clustering - K-Means, Agglomerative versus Divisive Hierarchical                              |   |  |  |  |
|   | Clustering, BIRCH, DBSCAN.  |   |  |  |  |
|   | Text Processing :-  |   |  |  |  |
|   | Boolean retrieval, Example IR problem, inverted index, processing                             |   |  |  |  |
| 4 | Boolean queries, tokenization, stemming, phrase queries, vector space                         | 9 |  |  |  |
|   | model, finite automata and language model, query likelihood model,                            |   |  |  |  |
|   | naïve bayes text classification.  |   |  |  |  |

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal Examination-1 (Written) | Internal Examination- 2 (Written) | Total |
|------------|--------------------------|----------------------------------|-----------------------------------|-------|
| 5          | 15                       | 10                               | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

| Part A                       | Part B  | Total     |
|------------------------------|---|-----------|
| 2 Questions from each        | Each question carries 9 marks.                      |           |
| module.                      | Two questions will be given from each module, out   |           |
| • Total of 8 Questions, each | of which 1 question should be answered.             | <b>60</b> |
| carrying 3 marks             | Each question can have a maximum of 3 subdivisions. | 60        |
|                              |   |           |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                   |           |

At the end of the course students should be able to:

|     | Course Outcome   | Bloom's<br>Knowledge<br>Level (KL) |
|-----|--|------------------------------------|
| CO1 | Explain the key concepts of data analytics   | K2                                 |
| CO2 | Apply appropriate techniques to convert raw data into suitable format for practical data analytics tasks   | К3                                 |
| CO3 | Extend the concept of association rule mining in real world scenario   | К3                                 |
| CO4 | Select appropriate clustering and classification algorithms for various applications and extend data analytics methods to the new domains of data. | K4                                 |
| CO5 | Understand the basics of text analytics and text classification  | К3                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **DATA COMPRESSION**

( Common to CS/CD/CM/CR/AD/AI/AM/CN/CI)

| Course Code                     | PECST524 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60             |
| Credits                         | 3        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To introduce students to basic applications, concepts, and techniques of Data Compression.
- **2.** To develop skills for using recent data compression software to solve practical problems in a variety of disciplines.

| Module | Syllabus Description   |    |  |  |
|--------|--|----|--|--|
| No.    | Synabus Description  |    |  |  |
| 1      | Basic Compression Techniques:-  Data Compression Approaches - Variable-Length Codes, Run-Length Encoding, Space - Filling Curves, Dictionary-Based Methods, Transforms, Quantization.  Huffman Encoding - Huffman Decoding, Adaptive Huffman Coding, Facsimile Compression. Run Length Encoding (RLE), RLE Text compression, Dictionary based Coding- LZ77, LZ78, LZW and Deflate: Zip and Gzip compression. | 10 |  |  |
| 2      | Advanced Techniques:- Arithmetic Coding - The Basic Idea, Implementation, Underflow; Image Compression- Introduction, Approaches to Image Compression, History of Gray Codes, Image Transforms, Orthogonal Transforms, The Discrete Cosine Transform, Intermezzo: Statistical Distributions, JPEG, Human Vision and Color, The Wavelet Transform, Filter Banks, WSQ, Fingerprint Compression                 | 10 |  |  |

| 3 | Video Compression:- Video Compression - Analog video, Digital Video, Motion Compensation. MPEG standards MPEG, H.261   | 8 |
|---|--|---|
| 4 | Audio Compression:  Audio Compression - Companding, The Human Auditory System, Heinrich Georg Barkhausen, Linear Prediction, μ-Law and A-Law Companding, Shorten | 8 |

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject  Internal  Examination-1  (Written) |    | Internal Examination- 2 (Written) | Total |  |
|------------|--|----|-----------------------------------|-------|--|
| 5          | 15   | 10 | 10                                | 40    |  |

## **End Semester Examination Marks (ESE)**

| Part A                       | Part B  | Total     |
|------------------------------|---|-----------|
| • 2 Questions from each      | Each question carries 9 marks.                    |           |
| module.                      | Two questions will be given from each module, out |           |
| • Total of 8 Questions, each | of which 1 question should be answered.           | <b>60</b> |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60        |
|                              | subdivisions.                                     |           |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |           |

At the end of the course students should be able to:

|     | Course Outcome  | Bloom's<br>Knowledge<br>Level (KL) |
|-----|---|------------------------------------|
| CO1 | Describe the fundamental approaches in data compression techniques          | K2                                 |
| CO2 | Illustrate various classical data compression techniques                    | К3                                 |
| CO3 | Illustrate various text and image compression standards                     | К3                                 |
| CO4 | Describe the video compression mechanisms to reduce the redundancy in video | К3                                 |
| CO5 | Understand the fundamental principles of audio data compression             | K2                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **SEMESTER S5**

## **DIGITAL SIGNAL PROCESSING**

(Common to CS/CM/CA/AM)

| Course Code                     | PECST526            | CIE Marks   | 40             |
|---------------------------------|---------------------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0             | ESE Marks   | 60             |
| Credits                         | 3                   | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | Signals and Systems | Course Type | Theory         |

## **Course Objectives:**

- 1. To teach the concept of DFT and apply it for filtering data sequences.
- 2. To educate on the algorithms for complexity reduction in the computation of DFT.
- **3.** To teach the theory of FIR and IIR filters and to design FIR filters.
- **4.** To get exposed to the basic idea of some of the important techniques for designing efficient VLSI architectures for DSP.

## **SYLLABUS**

| Module<br>No. | Syllabus Description   | Contact<br>Hours |
|---------------|--|------------------|
| 1             | Definition of a digital signal processing system, Sampling, Sampling rate, DFT and IDFT (Properties of DFT). Linear Convolution using Circular Convolution, Convolution of long data sequences- Overlap add method, overlap save method. Linear filtering methods based on DFT – FFT (DIT-FFT only) – efficient computation of the DFT of a 2N point real sequences – correlation – use of FFT in linear filtering and correlation, Symmetries in the DFT                | 9                |
| 2             | Types of transfer functions- Ideal filters, Zero phase and linear phase transfer functions, Types of linear phase FIR transfer functions; Simple digital filters: Simple FIR digital filters (Low pass and high pass), Simple IIR digital filters (Low pass and high pass), All pass and minimum phase transfer function Design of FIR filter: window based design (Rectangular, Hamming, Hanning windows). Applications of DSP-Spectral analysis of sinusoidal signals. | 8                |

| 3 | Realization structures for FIR filters- direct, cascade, parallel. IIR Filter realization structures (Direct form I, II, cascade and Parallel and transposed structures); Computational accuracy in DSP implementation- Number formats for signals and coefficients in DSP systems, Dynamic range and precision, Sources of error in DSP implementation - A/D conversion error, DSP computational error, D/A Conversion error.  | 9  |
|---|---|----|
| 4 | FFT and FIR Filter realization on a fixed point processor -finite wordlength effects - Quantization, rounding and truncation, overflow and scaling. DSP Algorithm representations, data flow, control flow, signal flow graphs, block diagrams - Loop bound, iteration bound, critical path - Pipelining, parallel processing, low power architectures - Retiming, folding and unfolding techniques, applications.  Hands-on:  FPGA based hardware realization of the FFT algorithm, circular convolution, IIR and FIR filter structures using iVerilog.  To realize different DSP algorithms including basic multiply accumulation and shifting operations on a fixed point processor.  Analyze the effect of the finite wordlength by implementing the FFT algorithm and FIR filters by using fixed point coefficient representation in different formats like Q7, Q15 etc.  Design an FIR low pass filter using MATLAB/SCILAB and check how it filters a speech signal by recording it and playing the result. | 10 |

# Course Assessment Method (CIE: 40 marks, ESE: 60 marks)

# **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal Examination-1 (Written) | Internal Examination- 2 (Written) | Total |
|------------|--------------------------|----------------------------------|-----------------------------------|-------|
| 5          | 15                       | 10                               | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions

| Part A                       | Part B  | Total     |
|------------------------------|---|-----------|
| • 2 Questions from each      | Each question carries 9 marks.                    |           |
| module.                      | Two questions will be given from each module, out |           |
| • Total of 8 Questions, each | of which 1 question should be answered.           | <b>60</b> |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60        |
|                              | subdivisions.                                     |           |
| (8x3 =24 Marks)              | (4x9 = 36  marks)                                 |           |

**Course Outcomes (COs)** 

At the end of the course students should be able to:

|     | Course Outcome   | Bloom's<br>Knowledge<br>Level (KL) |
|-----|--|------------------------------------|
| CO1 | Understand the concept of DFT and apply it for determining the spectral information of data sequences. | К2                                 |
| CO2 | Apply algorithms for complexity reduction in the computation of DFT.                                   | К3                                 |
| CO3 | Use the theory of FIR and IIR filters and be able to design FIR filters using the window method.       | К3                                 |
| CO4 | Build the IIR and FIR filter transfer functions using suitable structures                              | К3                                 |
| CO5 | Identify the effect of finite wordlength on DSP algorithm implementation.                              | К3                                 |
| CO6 | Utilize the low power architectures for implementing the DSP algorithms                                | К3                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **SEMESTER S5**

## **COMPUTER GRAPHICS & MULTIMEDIA**

(Common to CS/CD/CR/CA/AD)

| Course Code                     | PECST527 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60             |
| Credits                         | 3        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To provide strong technological concepts in computer graphics including the three-dimensional environment representation in a computer, transformation of 2D/3D objects and basic mathematical techniques and algorithms used to build applications.
- **2.** To give a good understanding of the multimedia frameworks for audio/video domains and different compression algorithms.

#### **SYLLABUS**

| Module<br>No. | Syllabus Description   |    |  |
|---------------|--|----|--|
| 1             | Basics of Computer graphics - Basics of Computer Graphics and its applications. Video Display devices - LED, OLED, LCD, PDP and FED and reflective displays. Random and Raster scan displays and systems.  Line and Circle drawing Algorithms - Line drawing algorithms-Bresenham's algorithm, Liang-Barsky Algorithm, Circle drawing algorithms - Midpoint Circle generation algorithm, Bresenham's Circle drawing algorithm. | 10 |  |
| 2             | Geometric transformations - 2D and 3D basic transformations - Translation, Rotation, Scaling, Reflection and Shearing, Matrix representations and homogeneous coordinates.  Filled Area Primitives - Scan line polygon filling, Boundary filling and flood filling.  | 8  |  |
| 3             | <b>Transformations and Clipping Algorithms -</b> Window to viewport transformation. Cohen Sutherland and Midpoint subdivision line clipping  | 8  |  |

|   | algorithms, Sutherland Hodgeman and Weiler Atherton Polygon clipping         |   |
|---|--|---|
|   | algorithms.  |   |
|   | Three dimensional graphics - Three dimensional viewing pipeline.             |   |
|   | Projections- Parallel and Perspective projections. Visible surface detection |   |
|   | algorithms- Back face detection, Depth buffer algorithm, Scan line           |   |
|   | algorithm, A buffer algorithm.   |   |
|   | Fundamental of Multimedia - Introduction to Multimedia, Authoring and        |   |
|   | Tools, Graphics and Image Data Representations, Popular File Formats,        |   |
|   | Fundamental Concepts and types of Video, Basics of Digital Audio and its     |   |
| 4 | types.   | 9 |
| 4 | Compression Methods - Lossless Compression Algorithms- Run-Length            | 9 |
|   | Coding, Arithmetic Coding. Lossy Compression Algorithms- Transform           |   |
|   | Coding. JPEG and JPEG-LS Standard Image Compression, H.261. Video            |   |
|   | Compression Technique.   |   |

## **Course Assessment Method**

(CIE: 40 marks, ESE: 60 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal Examination-1 (Written) | Internal Examination- 2 (Written) | Total |
|------------|--------------------------|----------------------------------|-----------------------------------|-------|
| 5          | 15                       | 10                               | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions

| Part A                       | Part B  | Total |
|------------------------------|---|-------|
| • 2 Questions from each      | Each question carries 9 marks.                    |       |
| module.                      | Two questions will be given from each module, out |       |
| • Total of 8 Questions, each | of which 1 question should be answered.           | 60    |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60    |
|                              | subdivisions.                                     |       |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |       |

## **Course Outcomes (COs)**

At the end of the course students should be able to:

|     | Course Outcome   |    |  |  |
|-----|--|----|--|--|
| CO1 | Understand the principles of computer graphics and displays            | K2 |  |  |
| CO2 | Illustrate line drawing, circle drawing and polygon filling algorithms | К3 |  |  |
| CO3 | Illustrate 2D and 3D basic transformations and matrix representation   | К3 |  |  |
| CO4 | Demonstrate different clipping algorithms and 3D viewing pipeline.     | К3 |  |  |
| CO5 | Summarize the multimedia features and specific compression algorithms. | К2 |  |  |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   | 3   | 3   |     |     |     |     |     |     |      |      | 3    |
| CO2 | 3   | 3   | 3   | 3   |     |     |     |     |     |      |      | 3    |

# **Course Assessment Method**

(CIE: 40 marks, ESE: 60 marks)

# **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Assignment/ Microproject | Internal Examination-1 (Written) | Internal Examination- 2 (Written) | Total |
|------------|--------------------------|----------------------------------|-----------------------------------|-------|
| 5          | 15                       | 10                               | 10                                | 40    |

## **End Semester Examination Marks (ESE)**

In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions

| Part A                       | Part B  | Total |
|------------------------------|---|-------|
| • 2 Questions from each      | Each question carries 9 marks.                    |       |
| module.                      | Two questions will be given from each module, out |       |
| • Total of 8 Questions, each | of which 1 question should be answered.           | (0)   |
| carrying 3 marks             | • Each question can have a maximum of 3           | 60    |
|                              | subdivisions.                                     |       |
| (8x3 =24 marks)              | (4x9 = 36  marks)                                 |       |

## Course Outcomes (COs)

At the end of the course students should be able to:

|     | Course Outcome  | Bloom's<br>Knowledge<br>Level (KL) |
|-----|---|------------------------------------|
| CO1 | Enumerate the different classes of computers and where they are used in everyday life.  | K2                                 |
| CO2 | Compute the effect of hardware/software enhancements on the speedup of a processor using Amdahl's law.                                      | К3                                 |
| CO3 | Interpret possible dependencies that can cause hazards in a given block of code.  | К3                                 |
| CO4 | Summarize different strategies followed to ensure Instruction Level Parallelism.  | К2                                 |
| CO5 | Compare different strategies followed to ensure Instruction Level Parallelism and different strategies followed to ensure Data Parallelism. | К3                                 |
| CO6 | Illustrate the need for memory consistency models and cache coherence protocols and explain the principle behind it.                        | К3                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **SEMESTER S5**

## **DATA MINING**

(Common to CS/CD/CM/CA/AM)

| Course Code                     | PECST525 | CIE Marks   | 40             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 3:0:0:0  | ESE Marks   | 60             |
| Credits                         | 5/3      | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Theory         |

## **Course Objectives:**

- 1. To provide a thorough understanding of the key processes and concepts involved in data mining and data warehousing within application domains
- 2. To enable students to understand the different data pre-processing techniques, fundamentals and advanced concepts of classification, clustering, association rule mining, text mining and web mining, and apply these techniques in real-world scenarios

## **SYLLABUS**

| Module<br>No. | Syllabus Description   |   |  |  |  |  |  |
|---------------|--|---|--|--|--|--|--|
| 1             | Data Mining Fundamentals:-  Data Mining - concepts and applications, Knowledge Discovery in Database Vs Data mining, Architecture of typical data mining system, Data Mining Functionalities  Data warehouse - Differences between Operational Database Systems and Data Warehouses, Multidimensional data model- Warehouse schema, OLAP Operations, Data Warehouse Architecture | 8 |  |  |  |  |  |
| 2             | Data Preprocessing:-  Data Preprocessing - Need of data preprocessing, Data Cleaning- Missing values, Noisy data, Data Integration and Transformation  | 9 |  |  |  |  |  |

|   | Data Reduction - Data cube aggregation, Attribute subset selection, Dimensionality reduction, Numerosity reduction, Discretization and concept hierarchy generation.  |    |
|---|---|----|
| 3 | Classification And Clustering:-  Classification - Introduction, Decision tree construction principle, Information Gain, Gini index, Decision tree construction algorithm - ID3, Neural networks, back propagation, Evaluation measures - accuracy, precision, recall, F1 score Clustering - Introduction to clustering, distance measures, Clustering Paradigms, Partitioning Algorithm - k means, Hierarchical Clustering, DBSCAN            | 9  |
| 4 | Association Rule Analysis And Advanced Data Mining: -  Association Rule Mining - Concepts, Apriori algorithm, FP Growth Algorithm  Web Mining - Web Content Mining, Web Structure Mining- Page Rank, Web  Usage Mining- Preprocessing, Data structures, Pattern Discovery,  Pattern Analysis  Text Mining - Text Data Analysis and information Retrieval, Basic measures  for Text retrieval, Text Retrieval methods, Text Indexing Technique | 10 |

## Criteria for Evaluation(Evaluate and Analyse): 20 marks

Students must be asked to identify problems involving large datasets and identify the right solution from the concepts already learned. A comparison of the results with a similar approach also need to be performed to assess the Knowledge Level 5.

## **End Semester Examination Marks (ESE):**

In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions

| Part A                  | Part B   | Total |
|-------------------------|--|-------|
| 2 Questions from each   | 2 questions will be given from each module, out of |       |
| module.                 | which 1 question should be answered. Each          |       |
| • Total of 8 Questions, | question can have a maximum of 3 subdivisions.     | 60    |
| each carrying 3 marks   | Each question carries 9 marks.                     |       |
| (8x3 =24 marks)         | (4x9 = 36  marks)                                  |       |

## **Course Outcomes (COs)**

At the end of the course students should be able to:

|     | Bloom's<br>Knowledge<br>Level (KL)   |    |
|-----|--|----|
| CO1 | Understand the key process of data mining and data warehousing concepts in application domains.                      | K2 |
| CO2 | Apply appropriate pre-processing techniques to convert raw data into suitable format for practical data mining tasks | К3 |
| CO3 | Illustrate the use of classification and clustering algorithms in various application domains                        | К3 |
| CO4 | Comprehend the use of association rule mining techniques   | К3 |
| CO5 | Explain advanced data mining concepts and their applications in emerging domains                                     | К2 |

Note: K1-Remember, K2-Understand, K3-Apply, K4-Analyse, K5-Evaluate, K6-Create

# **CO-PO Mapping Table:**

| Credits                | 5/3      | Exam Hours         | 2 Hrs. 30 Min. |
| Prerequisites (if any) | GAMAT401 | <b>Course Type</b> | Theory         |
|                        | PCCST303 |                    |                |
|                        | PCCST502 |                    |                |

## **Course Objectives:**

- 1. To gain proficiency in designing and implementing sophisticated graph algorithms for analyzing large-scale networks, and apply these techniques to real-world problems such as social network analysis and transportation optimization.
- 2. To develop the ability to critically evaluate and enhance advanced graph algorithms for dynamic and evolving graphs, using real-world case studies to illustrate their application and performance in complex scenarios.

## **SYLLABUS**

| Module | Syllabus Description   |   |  |
|--------|--|---|--|
| No.    |  |   |  |
| 1      | Maximum Flow Algorithms - Dinic's Algorithm, Push-Relabel Algorithm.  Applications - network bandwidth allocation, data center resource management.  Minimum Cost Flow - Cycle-Canceling Algorithm, Capacity Scaling Algorithm. Applications - transportation logistics, network routing with cost constraints.  Assignments:  1. Network Bandwidth Allocation - Optimize bandwidth allocation in a communication network using Dinic's Algorithm.  Implement Dinic's Algorithm to solve a network flow problem where you are given a communication network represented as a directed graph with capacities on edges. Your goal is to maximize | 9 |  |

|   | the flow from a source node to a sink node. Use a real-world  |   |  |  |  |
|---|---|---|--|--|--|
|   | network dataset (e.g., a telecommunications network with nodes and  |   |  |  |  |
|   | link capacities).   |   |  |  |  |
|   | 2. Logistics Optimization - Optimize the transportation of goods in a   |   |  |  |  |
|   | supply chain network using the Capacity Scaling Algorithm.  |   |  |  |  |
|   | Use the Capacity Scaling Algorithm to address a logistics problem   |   |  |  |  |
|   | where you need to minimize transportation costs in a supply chain   |   |  |  |  |
|   | network. The network is represented as a graph where nodes  |   |  |  |  |
|   | represent locations (warehouses, distribution centers, etc.), and edges   |   |  |  |  |
|   | represent transportation routes with associated costs. Use a dataset  |   |  |  |  |
|   | representing a supply chain network with nodes, edges, and costs.   |   |  |  |  |
|   | Strongly Connected Components (SCC) - Tarjan's Algorithm, Kosaraju's  |   |  |  |  |
|   | Algorithm. Applications - analyzing web page link structures, understanding   |   |  |  |  |
|   | connected components in social networks.  |   |  |  |  |
|   | Dynamic Graph Connectivity - Dynamic connectivity algorithms, Eulerian  |   |  |  |  |
|   | and Hamiltonian paths. Applications - real-time network monitoring,   |   |  |  |  |
|   | dynamic route planning.   |   |  |  |  |
|   | Assignments:  |   |  |  |  |
|   | 1. Web Page Link Analysis - Objective: Analyze strongly connected   |   |  |  |  |
|   | components (SCC) in a web graph using Tarjan's Algorithm.   |   |  |  |  |
|   | Implement Tarjan's Algorithm to find SCCs in a web graph where  |   |  |  |  |
|   | nodes represent web pages and edges represent hyperlinks. SCCs  | 0 |  |  |  |
| 2 | help in understanding the structure of the web and identifying  | 9 |  |  |  |
|   | clusters of interconnected pages. Use a real-world web graph dataset  |   |  |  |  |
|   | with nodes and edges.   |   |  |  |  |
|   | 2. Dynamic Route Planning - Manage and analyze routes in a  |   |  |  |  |
|   | transportation network that evolves over time using dynamic   |   |  |  |  |
|   | connectivity algorithms.  |   |  |  |  |
|   | Implement dynamic connectivity algorithms to handle a   |   |  |  |  |
|   | transportation network where edges and nodes may be added or  |   |  |  |  |
|   | removed over time. The goal is to maintain and update the   |   |  |  |  |
|   | connectivity information efficiently. Use a dataset representing a  |   |  |  |  |
|   | transportation network with dynamic updates.  |   |  |  |  |
|   | Graph Matching - Edmonds' Algorithm for finding maximum matchings.  |   |  |  |  |
|   | Applications - job assignment, network design.  | 9 |  |  |  |
| 3 | Graph Coloring - Colorings for special classes of graphs (e.g., planar graphs,  |   |  |  |  |
|   | interval graphs). Applications - frequency assignment in wireless networks,   |   |  |  |  |
|   | 1 5 |   |  |  |  |

| 1 1 1   |      | 1 1  |      |
|---------|------|------|------|
| schedul | lıng | prob | lems |

#### **Assignments:**

- Job Assignment Optimization Solve job assignment problems using Edmonds' Algorithm.
  - Implement Edmonds' Blossom Algorithm to address job assignment problems where you need to match workers to jobs in a way that maximizes the overall efficiency or minimizes the cost. Use a dataset with job assignments and associated costs or efficiencies.
- 2. Frequency Assignment Allocate frequencies in wireless communication systems using graph coloring techniques.

Apply graph coloring techniques to allocate frequencies to transmitters in a wireless communication network to avoid interference. The goal is to minimize the number of frequencies used while ensuring that adjacent transmitters do not use the same frequency. Use a dataset representing a network of transmitters with potential interference.

Graph Partitioning and Community Detection - Kernighan-Lin Algorithm, Spectral Partitioning. Applications - social network community detection, large-scale data clustering.

Parameterized Algorithms for Graph Problems - Fixed-parameter tractability for vertex cover, feedback vertex set. Applications - network security, bioinformatics.

#### **Assignments:**

- 1. Social Network Community Detection Detect communities in a social network using the Kernighan-Lin Algorithm.
  - Apply the Kernighan-Lin Algorithm to detect communities in a social network where nodes represent individuals and edges represent relationships. The goal is to find clusters of highly interconnected individuals. Use a social network dataset with nodes and edges representing social connections.
- 2. Network Security Analysis Identify critical nodes in a network using parameterized algorithms to assess network security.
  - Use parameterized algorithms to identify critical nodes and vulnerabilities in a network. These nodes are crucial for the network's connectivity, and their removal would impact the network's security and robustness. Use a dataset representing a network with nodes and edges, along with possible vulnerabilities.

#### **Course Assessment Method**

(CIE: 40 marks, ESE: 60 marks)

#### **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Internal Ex | Evaluate | Analyse | Total |
|------------|-------------|----------|---------|-------|
| 5          | 15          | 10       | 10      | 40    |

### Criteria for Evaluation(Evaluate and Analyse): 20 marks

Assignment evaluation pattern:

- Correctness and Accuracy (30%) Correct Solution and Implementation.
- Effectiveness and Efficiency (25%) Algorithm Efficiency and Performance Metrics.
- Analytical Depth (25%) Problem Understanding and Solution Analysis.
- Justification and Comparisons (20%) Choice Justification and Comparative Analysis.

#### **End Semester Examination Marks (ESE):**

In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions

| Part A                                    | Part B   | Total |
|---|--|-------|
| 2 Questions from each                     | 2 questions will be given from each module, out of |       |
| module.                                   | which 1 question should be answered. Each          |       |
| <ul> <li>Total of 8 Questions,</li> </ul> | question can have a maximum of 3 subdivisions.     | 60    |
| each carrying 3 marks                     | Each question carries 9 marks.                     |       |
| (8x3 =24 marks)                           | (4x9 = 36  marks)                                  |       |

## **Course Outcomes (COs)**

At the end of the course students should be able to:

|     | Course Outcome   | Bloom's<br>Knowledge<br>Level (KL) |
|-----|--|------------------------------------|
| CO1 | Develop and implement advanced algorithms for network flow, graph connectivity, and matching, and evaluate their performance on real-world datasets.                                     | К3                                 |
| CO2 | Analyze and compare the efficiency and effectiveness of various graph algorithms, including those for network optimization and community detection.                                      | K4                                 |
| CO3 | Apply advanced graph algorithms to solve practical problems such as network optimization, job assignment, and frequency allocation, demonstrating their utility in real-world scenarios. | К3                                 |
| CO4 | Formulate and solve complex graph-related problems using appropriate algorithms, including those for graph traversal, minimum spanning trees, and network security analysis.             | K5                                 |
| CO5 | Critically assess the strengths and limitations of different graph algorithms, and effectively communicate findings and recommendations through detailed reports and presentations.      | K5                                 |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

## **CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   | 3   | 3   | 3   |     |     |     |     |     |      |      | 2    |
| CO2 | 3   | 3   | 3   | 3   |     |     |     |     |     |      |      | 2    |
| CO3 | 3   | 3   | 3   | 3   |     |     |     |     |     |      |      | 2    |
| CO4 | 3   | 3   | 3   | 3   |     |     |     |     |     |      |      | 2    |

## **SEMESTER S5**

## **NETWORKS LAB**

(Common to CS/CD/CM/CB/CU/CI)

| Course Code                     | PCCSL507 | CIE Marks   | 50             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 0:0:3:0  | ESE Marks   | 50             |
| Credits                         | 2        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Lab            |

## **Course Objectives:**

- **1.** To provide hands-on experience in network programming using Linux System calls and network monitoring tools.
- **2.** To comprehend the implementation of network protocols and algorithms, and configuration of network layer services using network simulators.

| Expt. | Experiments  |  |  |  |  |
|-------|--|--|--|--|--|
| No.   | Experiments  |  |  |  |  |
|       | Warm up  |  |  |  |  |
| 1     | Familiarize Linux networking commands - ifconfig, ifplugstatus, iftop, ping, ip,       |  |  |  |  |
| 1     | traceroute, mtr, netstat, whois, nmap, nmcli, speedtest-cli, bmon, nslookup, tcpdump   |  |  |  |  |
|       | Wireshark based  |  |  |  |  |
|       | Start your web browser and clear the browser's cache memory. Open Wireshark and start  |  |  |  |  |
|       | capturing. Then visit any webpage of your choice. Type http in the filter field of the |  |  |  |  |
|       | Wireshark and click Apply so that only HTTP messages are displayed. After enough       |  |  |  |  |
|       | packets have been captured, select the Capture from the pull-down menu and select Stop |  |  |  |  |
|       | to stop capturing.   |  |  |  |  |
|       | Using the captured information, determine the following:                               |  |  |  |  |
| 2     | (a) the source IP address and destination IP address of the first GET message          |  |  |  |  |
|       | (b) the medium format, the language, the encoding, and the character set that the      |  |  |  |  |
|       | client can accept. (Use the first GET message)   |  |  |  |  |
|       | (c) the URL of the website and the user agent (Use the first GET message)              |  |  |  |  |
|       | (d) the source IP address and destination IP address of the first response message     |  |  |  |  |
|       | (e) the status codes for the first response message.                                   |  |  |  |  |
|       | (f) when the HTML file that you are retrieving was last modified at the server         |  |  |  |  |

(g) value of the content-length field of the first response message (h) how long it took from the time the GET message was sent until the response message was received. (Use the timestamps of a GET message and that of the corresponding response message. By default, the time column's value is the amount of time in seconds since Wireshark tracing began.) (i) the HTTP version of your browser. Compose an e-mail and address it to yourself, but do not send it yet. Open the Wireshark and start capturing. Go to your e-mail user agent and send the e-mail. In the Wireshark window, type smtp in the filter field and click Apply. Stop capturing and save the captured file. Using the captured information, answer the following: (a) All SMTP packets have the same two IP addresses. Which one is the IP address of your computer? Which host does the other IP address represent? 3 (b) All SMTP packets have the same two port numbers. Which one is the port number of the SMTP client process? In which range is the client port number? (c) What is the port number of the SMTP server process? (d) Examine the SMTP commands or SMTP response codes in each SMTP packet and write down their meanings. (e) There is an IMF packet that is encapsulated inside an SMTP packet. What is the content of this packet? First, clear the DNS record from the cache memory of your computer. For this, use ipconfig/flushdns on Windows or systemd-resolve --flush-caches on Linux. Next, clear your browser's cache memory. Open the Wireshark and start capturing. In your browser visit your college website. Wireshark starts to capture packets. Type **dns** in the filter field and press Apply so that only DNS messages are displayed. Stop capturing and save the captured file. Using the captured information, answer the following questions: (a) Locate the first DNS query message resolving your college website. What is the packet number (This "packet number" is assigned by Wireshark for listing purposes only; it is NOT a packet number contained in any real packet header.) in the trace for the DNS query message? (b) Is this query message sent over UDP or TCP? (c) Now locate the corresponding DNS response to the initial DNS query. What is the packet number in the trace for the DNS response message? Is this response message received via UDP or TCP? (d) What are the source and destination port numbers for the DNS query message?

|   | (e) What are the source and destination port numbers for the DNS response message?                                |  |  |  |  |
|---|---|--|--|--|--|
|   | (f) To what IP address is the DNS query message sent?   |  |  |  |  |
|   | (g) What is the query message ID number? What is the response message ID number?                                  |  |  |  |  |
|   | What is the purpose of this field?  |  |  |  |  |
|   | (h) What is the length of the flag field in a DNS message?  |  |  |  |  |
|   | (i) Which bit in the flag field determines whether the message is a query or a response?                          |  |  |  |  |
|   | (j) Which bits are used only in the response message? What is the function of these bits in the response message? |  |  |  |  |
|   | (k) How many question records, answer records, authority records, and additional                                  |  |  |  |  |
|   | records are present in the query message?   |  |  |  |  |
|   | (l) How many question records, answer records, authority records, and additional                                  |  |  |  |  |
|   | records are present in the response message?  |  |  |  |  |
|   | Socket programming based  |  |  |  |  |
|   | Client-Server communication using TCP:- The client inputs an integer $N$ and creates a                            |  |  |  |  |
|   | square matrix of order $N$ by populating the matrix with random numbers in the range                              |  |  |  |  |
| 5 | [1,50]. It then sends the matrix to the server which identifies the matrix type (upper                            |  |  |  |  |
| - | triangular, lower triangular, diagonal). The server then informs the type (as a string) to the                    |  |  |  |  |
|   | client which it prints.   |  |  |  |  |
|   | Client-Server communication using UDP:- You are very good at communicating in the                                 |  |  |  |  |
|   | "new generation" English language with all sorts of abbreviations like <b>tbh</b> , <b>ig</b> , etc. Now          |  |  |  |  |
|   | design a client-server application as follows: The client inputs a new-generation English                         |  |  |  |  |
|   | sentence from the user and sends it to the server. The server then translates the received                        |  |  |  |  |
|   | sentence to formal English and sends the translated sentence back to the client which it                          |  |  |  |  |
|   | prints.   |  |  |  |  |
|   | Sample string sent to the server  |  |  |  |  |
| 6 | Really idc about this stupid server as it is of no use irl but atm, I will design one, tbf to the                 |  |  |  |  |
|   | professor.  |  |  |  |  |
|   | Translated string sent back to the client   |  |  |  |  |
|   | Really I don't care about this stupid server as it is of no use in real life but at the moment, I                 |  |  |  |  |
|   | will design one, to be fair to the professor.   |  |  |  |  |
|   | You may consider only the following abbreviations: tbh, ig, tbf, atm, irl, lol, asap, omg,                        |  |  |  |  |
|   | ttyl, idk, nvm  |  |  |  |  |
| 7 | Implement a multi-user chat server using TCP as the transport layer protocol.                                     |  |  |  |  |
| , | Implement a concurrent Time Server application using UDP to execute the program at a                              |  |  |  |  |
| 8 | remote server. The client sends a time request to the server which sends its system time                          |  |  |  |  |
|   | Temper 251.51. The orient series a time request to the server which series its system time                        |  |  |  |  |

|    | back. The client then displays the received time value.                                       |  |  |  |  |  |  |
|----|---|--|--|--|--|--|--|
|    | Develop a concurrent file server that will provide the file requested by the client if it     |  |  |  |  |  |  |
|    |   |  |  |  |  |  |  |
| 9  | exists. If not, the server sends an appropriate message to the client. The server should also |  |  |  |  |  |  |
|    | send its process ID (PID) to clients for displaying along with the file contents or with the  |  |  |  |  |  |  |
|    | message.  |  |  |  |  |  |  |
| 10 | Develop a packet-capturing application using raw sockets.                                     |  |  |  |  |  |  |
|    | Cisco's Packet tracer based   |  |  |  |  |  |  |
|    | Familiarizing router commands   |  |  |  |  |  |  |
|    | (a) Knowing the current mode (user or privileged), switching to privileged mode               |  |  |  |  |  |  |
|    | (b) Switching to configuration mode   |  |  |  |  |  |  |
|    | (c) Obtaining router information such as type, OS, memory stats, interface details etc.       |  |  |  |  |  |  |
|    | (d) Viewing the status of any routing protocols currently configured                          |  |  |  |  |  |  |
|    | (e) Showing the routing table   |  |  |  |  |  |  |
| 11 | (f) Saving the running configuration  |  |  |  |  |  |  |
| 11 | (g) Viewing the command history   |  |  |  |  |  |  |
|    | (h) Viewing the router clock  |  |  |  |  |  |  |
|    | (i) Viewing the list of hosts   |  |  |  |  |  |  |
|    | (j) Displaying the statistics for all the interfaces (Both detailed and brief views)          |  |  |  |  |  |  |
|    | (k) Knowing the controller type (DTE or DCE)  |  |  |  |  |  |  |
|    | (l) Configuring serial and ethernet interfaces - enabling the interface, setting IP           |  |  |  |  |  |  |
|    | address, mask, and clock rate   |  |  |  |  |  |  |
|    | 172.16.30.0   |  |  |  |  |  |  |
|    |   |  |  |  |  |  |  |
|    |   |  |  |  |  |  |  |
|    | EO  |  |  |  |  |  |  |
|    | E0 S0 S1 S0   |  |  |  |  |  |  |
|    | F0/0 2501A 2501B 25   |  |  |  |  |  |  |
| 0  | 250174 250115 25  |  |  |  |  |  |  |
|    |   |  |  |  |  |  |  |

| router | Interface | I   |
|--------|-----------|-----|
| 2621   | F0/0      | 1   |
| 2501A  | E0        | 1   |
| 2501A  | S0        | 1   |
| 2501B  | E0        | 1   |
| 2501B  | S0        | 1   |
| 2501B  | S1        | 1   |
| 05040  | 00        | 112 |

| 12 | Set up static routing for the network shown in Figure 1. Once the routes are set up, display the routing table and verify the connectivity using <b>ping</b> .  |
|----|---|
| 13 | Implement RIPv2 routing for the network shown in Figure 1. Once the routes are set up,  |
|    | display the routing table and verify the connectivity using <b>ping</b> .   |
| 14 | Implement OSPF routing for the network shown in Figure 1. Once the routes are set up, display the routing table and verify the connectivity using <b>ping</b> . |
|    | You are the network administrator of your college. A small portion of your campus   |
|    | network is shown in Figure 2. You want to allow only Host_B to communicate with the   |
| 15 | network 172.16.10.0. Verify your settings by the following checks:  |

- (a) Pinging Host\_A from Host\_B
- (b) Pinging Host\_A from Lab\_B and Lab\_C

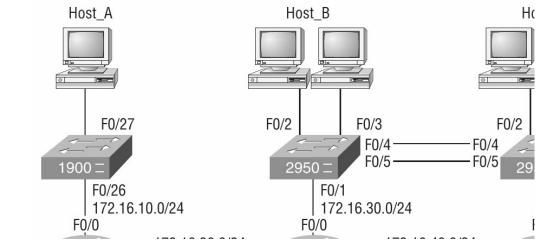

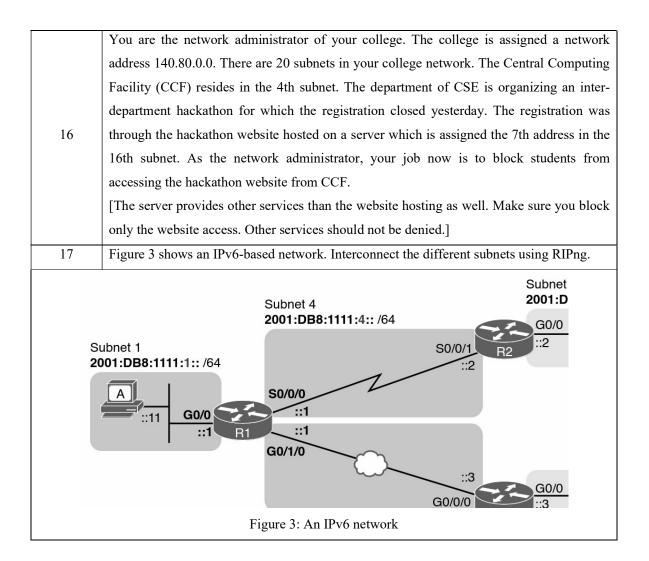

Figure 2: A portion of your college campus network

#### **Course Assessment Method**

(CIE: 50 marks, ESE: 50 marks)

#### **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Preparation/Pre-Lab Work experiments, Viva and Timely completion of Lab Reports / Record (Continuous Assessment) | Internal<br>Examination | Total |
|------------|--|-------------------------|-------|
| 5          | 25   | 20                      | 50    |

## **End Semester Examination Marks (ESE):**

| Procedure/   | Conduct of experiment/ | Result with valid |      |        |        |
|--------------|------------------------|-------------------|------|--------|--------|
| Preparatory  | Execution of work/     | inference/        | Viva | Darand | Total  |
| work/Design/ | troubleshooting/       | Quality of        | voce | Record | 1 Otai |
| Algorithm    | Programming            | Output            |      |        |        |
| 10           | 15                     | 10                | 10   | 5      | 50     |

- Submission of Record: Students shall be allowed for the end semester examination only upon submitting the duly certified record.
- Endorsement by External Examiner: The external examiner shall endorse the record

### **Course Outcomes (COs)**

At the end of the course students should be able to:

|     | Course Outcome   | Bloom's<br>Knowledge<br>Level (KL) |
|-----|--|------------------------------------|
| CO1 | Understand the working of application layer protocols by analyzing the pertinent headers in actual data packets captured using network monitoring tools. | К3                                 |
| CO2 | Exploit the client server paradigm to develop real time networking applications using transport layer protocols.   | К3                                 |
| CO3 | Employ IPv4 and IPv6 addressing, subnetting to efficiently design networks.  | К3                                 |
| CO4 | Simulate core networking concepts using a network simulator.   | К3                                 |

Note: K1-Remember, K2-Understand, K3-Apply, K4-Analyse, K5-Evaluate, K6-Create

## **CO- PO Mapping (Mapping of Course Outcomes with Program Outcomes)**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   | 3   | 3   | 3   | 3   |     |     |     |     |      |      | 3    |
| CO2 | 3   | 3   | 3   | 3   |     | 2   |     |     |     |      |      | 3    |
| CO3 | 3   | 3   | 3   | 3   |     |     |     |     |     |      |      | 3    |
| CO4 | 3   | 3   | 3   | 3   | 3   |     |     |     |     |      |      | 3    |

1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

|        | Text Books  |   |                          |                  |  |  |
|--------|---|---|--------------------------|------------------|--|--|

# **Continuous Assessment (25 Marks)**

# 1. Preparation and Pre-Lab Work (7 Marks)

• Pre-Lab Assignments: Assessment of pre-lab assignments or quizzes that test understanding of the upcoming experiment.

• Understanding of Theory: Evaluation based on students' preparation and understanding of the theoretical background related to the experiments.

### 2. Conduct of Experiments (7 Marks)

- Procedure and Execution: Adherence to correct procedures, accurate execution of experiments, and following safety protocols.
- Skill Proficiency: Proficiency in handling equipment, accuracy in observations, and troubleshooting skills during the experiments.
- Teamwork: Collaboration and participation in group experiments.

#### 3. Lab Reports and Record Keeping (6 Marks)

- Quality of Reports: Clarity, completeness and accuracy of lab reports. Proper documentation of experiments, data analysis and conclusions.
- Timely Submission: Adhering to deadlines for submitting lab reports/rough record and maintaining a well-organized fair record.

#### 4. Viva Voce (5 Marks)

• Oral Examination: Ability to explain the experiment, results and underlying principles during a viva voce session.

Final Marks Averaging: The final marks for preparation, conduct of experiments, viva, and record are the average of all the specified experiments in the syllabus.

#### **Evaluation Pattern for End Semester Examination (50 Marks)**

#### 1. Procedure/Preliminary Work/Design/Algorithm (10 Marks)

- Procedure Understanding and Description: Clarity in explaining the procedure and understanding each step involved.
- Preliminary Work and Planning: Thoroughness in planning and organizing materials/equipment.
- Algorithm Development: Correctness and efficiency of the algorithm related to the experiment.
- Creativity and logic in algorithm or experimental design.

#### 2. Conduct of Experiment/Execution of Work/Programming (15 Marks)

 Setup and Execution: Proper setup and accurate execution of the experiment or programming task.

## 3. Result with Valid Inference/Quality of Output (10 Marks)

- Accuracy of Results: Precision and correctness of the obtained results.
- Analysis and Interpretation: Validity of inferences drawn from the experiment or quality of program output.

## 4. Viva Voce (10 Marks)

- Ability to explain the experiment, procedure results and answer related questions
- Proficiency in answering questions related to theoretical and practical aspects of the subject.

#### 5. Record (5 Marks)

• Completeness, clarity, and accuracy of the lab record submitted

## **SEMESTER 5**

## MACHINE LEARNING LAB

(Common to CS/CA)

| Course Code                     | PCCSL508 | CIE Marks   | 50             |
|---------------------------------|----------|-------------|----------------|
| Teaching Hours/Week (L: T:P: R) | 0:0:3:0  | ESE Marks   | 50             |
| Credits                         | 2        | Exam Hours  | 2 Hrs. 30 Min. |
| Prerequisites (if any)          | None     | Course Type | Lab            |

## **Course Objectives:**

1. To give the learner a practical experience of the various machine learning techniques and be able to demonstrate them using a language of choice.

| Expt. No. | Experiments  |
|-----------|--|
|           | Implement linear regression with one variable on the California Housing dataset to predict |
|           | housing prices based on a single feature (e.g., the average number of rooms per dwelling). |
|           | Tasks:   |
| 1         | Load and preprocess the datase.  |
|           | • Implement linear regression using both gradient descent and the normal equation.         |
|           | Evaluate the model performance using metrics such as Mean Squared Error                    |
|           | (MSE) and R-squared.   |
|           | Visualize the fitted line along with the data points.                                      |
|           | Implement polynomial regression on the Auto MPG dataset to predict miles per gallon        |
|           | (MPG) based on engine displacement. Compare polynomial regression results with linear      |
|           | regression.  |
|           | Tasks:   |
| 2         | Load and preprocess the dataset.   |
|           | Implement polynomial regression of varying degrees.  |
|           | Compare the polynomial regression models with linear regression using metrics              |
|           | such as MSE and R-squared.   |
|           | Visualize the polynomial fit.  |
|           | Implement Ridge and Lasso regression on the Diabetes dataset. Compare the performance      |
| 3         | of these regularized models with standard linear regression.                               |
|           | Tasks:   |

|   | Load and preprocess the dataset.  |
|---|---|
|   | Implement Ridge and Lasso regression.   |
|   | Tune hyperparameters using cross-validation.  |
|   | Compare performance metrics (MSE, R-squared) with standard linear regression.               |
|   | Estimate the parameters of a logistic regression model using MLE and MAP on the Breast      |
|   | Cancer Wisconsin dataset. Compare the results and discuss the effects of regularization.    |
|   | Tasks:  |
|   | Load and preprocess the dataset.  |
| 4 | Implement logistic regression with MLE.   |
|   | • Apply MAP estimation with different regularization priors (L1 and L2                      |
|   | regularization).  |
|   | • Compare the performance and parameter estimates with MLE and MAP.                         |
|   |   |
|   | Use MLE and MAP to estimate the parameters of a multinomial distribution on the 20          |
|   | Newsgroups dataset. Explore the impact of different priors on the estimation.               |
|   | Tasks:  |
| 5 | Load and preprocess the dataset.  |
|   | Implement MLE for multinomial distribution parameter estimation.                            |
|   | <ul> <li>Apply MAP estimation with various priors (e.g., Dirichlet priors).</li> </ul>      |
|   | Compare results and evaluate the effect of different priors.                                |
|   | Implement a logistic regression model to predict the likelihood of a disease using the Pima |
|   | Indians Diabetes dataset. Compare the performance with and without feature scaling.         |
|   | Tasks:  |
| 6 | Load and preprocess the Pima Indians Diabetes dataset.                                      |
|   | Implement logistic regression for binary classification.                                    |
|   | <ul> <li>Evaluate model performance with and without feature scaling.</li> </ul>            |
|   | <ul> <li>Analyze metrics such as accuracy, precision, recall, and F1-score.</li> </ul>      |
|   | Implement a Naïve Bayes classifier to categorize text documents into topics using the 20    |
|   | Newsgroups dataset. Compare the performance of Multinomial Naïve Bayes with                 |
|   | Bernoulli Naïve Bayes.  |
|   | Tasks:  |
| 7 | Load and preprocess the 20 Newsgroups dataset.  |
| 7 | Implement Multinomial Naïve Bayes and Bernoulli Naïve Bayes classifiers.                    |
|   | • Evaluate and compare the performance of both models using metrics such as                 |
|   | accuracy and F1-score.  |
|   | Discuss the strengths and weaknesses of each Naïve Bayes variant for text                   |
|   | classification.   |
|   | 1   |

|    | Implement the K-Nearest Neighbors (KNN) algorithm for image classification using the             |
|----|--|
|    | Fashion MNIST dataset. Experiment with different values of K and analyze their impact            |
|    | on model performance.  |
|    | Tasks:   |
| 8  | <ul> <li>Load and preprocess the Fashion MNIST dataset.</li> </ul>                               |
|    | Implement KNN for multi-class classification.  |
|    | <ul> <li>Experiment with different values of K and evaluate performance.</li> </ul>              |
|    | <ul> <li>Discuss the impact of different K values on model accuracy and computational</li> </ul> |
|    | efficiency.  |
|    | Implement a Decision Tree classifier using the ID3 algorithm to segment customers based          |
|    | on their purchasing behavior using the Online Retail dataset. Analyze the tree structure         |
|    | and discuss the feature importance.  |
|    | Tasks:   |
| 9  | Load and preprocess the Online Retail dataset.   |
|    | Implement Decision Tree using the ID3 algorithm.   |
|    | Visualize the decision tree and analyze feature importance.                                      |
|    | Discuss how the tree structure helps in understanding customer behavior.                         |
|    | Implement and compare Logistic Regression and Decision Trees on the Adult Income                 |
|    | dataset for predicting income levels. Evaluate both models based on performance metrics          |
|    | and interpretability.  |
|    | Tasks:   |
| 10 | Load and preprocess the Adult Income dataset.  |
|    | Implement both Logistic Regression and Decision Trees.   |
|    | • Compare the models based on metrics such as accuracy, precision, recall, and F1-               |
|    | score.   |
|    | Discuss the interpretability of both models and their suitability for the dataset.               |
|    | Implement a Linear Support Vector Machine (SVM) to classify the Iris dataset. Visualize          |
|    | the decision boundary and discuss how the margin is determined.                                  |
|    | Tasks:   |
| 11 | Load and preprocess the Iris dataset.  |
|    | • Implement a Linear SVM for binary classification (e.g., classify Setosa vs. Non-               |
|    | Setosa).   |
|    | Visualize the decision boundary and margin.  |
|    | Discuss the concept of the margin and how it influences classification.                          |
|    | Implement and compare the performance of SVM classifiers with linear, polynomial, and            |
| 12 | RBF kernels on the Fashion MNIST dataset. Analyze the advantages and disadvantages of            |
|    | each kernel type.  |

|    | Tasks:  |
|----|---|
|    | <ul> <li>Load and preprocess the Fashion MNIST dataset.</li> </ul>                                  |
|    | <ul> <li>Implement SVM with linear, polynomial, and RBF kernels.</li> </ul>                         |
|    | <ul> <li>Compare the classification performance for each kernel.</li> </ul>                         |
|    | <ul> <li>Discuss the strengths and weaknesses of each kernel type.</li> </ul>                       |
|    |   |
|    | Implement and train a Multilayer Feed-Forward Network (MLP) on the Wine Quality                     |
|    | dataset. Experiment with different numbers of hidden layers and neurons, and discuss how            |
|    | these choices affect the network's performance.   |
|    | Tasks:  |
| 13 | Load and preprocess the Wine Quality dataset.   |
|    | Design and implement an MLP with varying architectures (different hidden layers)                    |
|    | and neurons).   |
|    | Train and evaluate the network.   |
|    | Discuss the impact of architecture choices on performance.  |
|    | Implement and compare the performance of a neural network using different activation                |
|    | functions (Sigmoid, ReLU, Tanh) on the MNIST dataset. Analyze how each activation                   |
|    | function affects the training process and classification accuracy.                                  |
| 14 | Tasks:  |
| 14 | <ul> <li>Load and preprocess the MNIST dataset.</li> </ul>  |
|    | Implement neural networks using Sigmoid, ReLU, and Tanh activation functions.                       |
|    | Train and evaluate each network.  |
|    | Compare training times, convergence, and classification accuracy.                                   |
|    | Implement and perform hyperparameter tuning for a neural network on the Fashion                     |
|    | MNIST dataset. Experiment with different learning rates, batch sizes, and epochs, and               |
|    | discuss the impact on model performance.  |
|    | Tasks:  |
| 15 | <ul> <li>Load and preprocess the Fashion MNIST dataset.</li> </ul>                                  |
|    | • Experiment with different hyperparameters (learning rate, batch size, epochs).                    |
|    | Train and evaluate the network.   |
|    | Discuss how hyperparameter choices affect model performance.  |
|    | Implement and compare hierarchical (agglomerative) and partitional (K-means) clustering             |
|    | algorithms on the Mall Customers dataset. Discuss the strengths and weaknesses of each              |
|    | method based on clustering results and evaluation metrics.  |
| 16 | Tasks:  |
|    | Load and preprocess the Mall Customers dataset.   |
|    | <ul> <li>Apply both hierarchical (agglomerative) and K-means clustering.</li> </ul>                 |
|    | <ul> <li>Compare results using metrics such as inertia, silhouette score, and clustering</li> </ul> |
|    | Compare results using metries such as metria, simouette score, and clustering                       |

|    | -:   |
|----|--|
|    | visualization.   |
|    | Discuss the advantages and disadvantages of each clustering method.                              |
|    | Implement and apply K-means clustering to the Digits dataset. Experiment with different          |
|    | numbers of clusters and evaluate the clustering results using metrics such as inertia and        |
|    | silhouette score. Analyze how the choice of K affects clustering performance.                    |
| 17 | Tasks:   |
| 1, | <ul> <li>Load and preprocess the Digits dataset.</li> </ul>                                      |
|    | • Implement K-means clustering with various numbers of clusters.                                 |
|    | <ul> <li>Evaluate clustering performance using inertia and silhouette score.</li> </ul>          |
|    | <ul> <li>Analyze the impact of the number of clusters on clustering quality.</li> </ul>          |
|    | Implement bootstrapping and cross-validation on the Iris dataset. Compare the model              |
|    | performance metrics (e.g., accuracy, F1-score) obtained using these resampling methods.          |
|    | Discuss the advantages and disadvantages of each method.   |
|    | Tasks:   |
| 18 | Load and preprocess the Iris dataset.  |
|    | <ul> <li>Implement bootstrapping to generate multiple samples and evaluate the model.</li> </ul> |
|    | Implement k-fold cross-validation and evaluate the model.  |
|    | Compare the performance metrics and discuss the pros and cons of each                            |
|    | resampling method.   |
|    | Implement bagging and boosting ensemble methods on the Titanic dataset. Compare the              |
|    | performance of both methods in terms of accuracy, precision, recall, and F1-score.               |
|    | Discuss how each method improves model performance and their respective strengths and            |
|    | weaknesses.  |
|    | Tasks:   |
| 10 | Load and preprocess the Titanic dataset.   |
| 19 | • Implement bagging using a base classifier (e.g., decision tree) and evaluate                   |
|    | performance.   |
|    | • Implement boosting using a boosting algorithm (e.g., AdaBoost) and evaluate                    |
|    | performance.   |
|    | Compare performance metrics and discuss the strengths and weaknesses of each                     |
|    | method.  |
|    | Investigate the bias-variance tradeoff using polynomial regression on the Boston Housing         |
| •  | dataset. Plot the training and validation errors for various polynomial degrees and discuss      |
|    | the tradeoff between bias and variance.  |
| 20 | Tasks:   |
|    | <ul> <li>Load and preprocess the Boston Housing dataset.</li> </ul>                              |
|    | Implement polynomial regression with varying degrees.  |
|    |  |

- Plot training and validation errors for each degree.
- Discuss the bias-variance tradeoff and its impact on model performance.

#### **Course Assessment Method**

(CIE: 50 marks, ESE: 50 marks)

## **Continuous Internal Evaluation Marks (CIE):**

| Attendance | Preparation/Pre-Lab Work experiments, Viva and Timely completion of Lab Reports / Record (Continuous Assessment) | Internal<br>Examination | Total |
|------------|--|-------------------------|-------|
| 5          | 25   | 20                      | 50    |

#### **End Semester Examination Marks (ESE):**

| Conduct of experiment/ | Result with valid                               |  |  |   |
|------------------------|---|--|--|---|
| Execution of work/     | inference/                                      | Viva   | Darand   | T-4-1   |
| troubleshooting/       | Quality of                                      | voce   | Record   | Total   |
| Programming            | Output  |  |  |   |
| 15                     | 10  | 10   | 5  | 50  |
|                        | Execution of work/ troubleshooting/ Programming | Execution of work/ inference/ troubleshooting/ Quality of Programming Output | Execution of work/ inference/ Viva troubleshooting/ Quality of voce Programming Output | Execution of work/ inference/ Viva troubleshooting/ Quality of voce Programming Output Record |

- Submission of Record: Students shall be allowed for the end semester examination only upon submitting the duly certified record.
- Endorsement by External Examiner: The external examiner shall endorse the record

#### **Course Outcomes (COs)**

At the end of the course students should be able to:

|     | Course Outcome  | Bloom's<br>Knowledge<br>Level (KL) |
|-----|---|------------------------------------|
| CO1 | Understand complexity of Machine Learning algorithms and their limitations;   | K2                                 |
| CO2 | Understand modern notions in data analysis-oriented computing;                | K2                                 |
| CO3 | Apply common Machine Learning algorithms in practice and implement their own. | К3                                 |
| CO4 | Performing experiments in Machine Learning using real-world data.             | К3                                 |

Note: K1-Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

# **CO- PO Mapping (Mapping of Course Outcomes with Program Outcomes)**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| CO1 | 3   | 3   | 3   |     | 3   |     |     |     |     |      |      | 3    |
| CO2 | 3   | 3   | 3   |     | 3   |     |     |     |     |      |      | 3    |
| CO3 | 3   | 3   | 3   |     | 3   |     |     |     |     |      |      | 3    |
| CO4 | 3   | 3   | 3   |     | 3   |     |     |     |     |      |      | 3    |

1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

| Text Books |                                       |  |                          |                  |

#### **Continuous Assessment (25 Marks)**

#### 1. Preparation and Pre-Lab Work (7 Marks)

- Pre-Lab Assignments: Assessment of pre-lab assignments or quizzes that test understanding of the upcoming experiment.
- Understanding of Theory: Evaluation based on students' preparation and understanding of the theoretical background related to the experiments.

#### 2. Conduct of Experiments (7 Marks)

- Procedure and Execution: Adherence to correct procedures, accurate execution of experiments, and following safety protocols.
- Skill Proficiency: Proficiency in handling equipment, accuracy in observations, and troubleshooting skills during the experiments.
- Teamwork: Collaboration and participation in group experiments.

#### 3. Lab Reports and Record Keeping (6 Marks)

- Quality of Reports: Clarity, completeness and accuracy of lab reports. Proper documentation of experiments, data analysis and conclusions.
- Timely Submission: Adhering to deadlines for submitting lab reports/rough record and maintaining a well-organized fair record.

#### 4. Viva Voce (5 Marks)

• Oral Examination: Ability to explain the experiment, results and underlying principles during a viva voce session.

Final Marks Averaging: The final marks for preparation, conduct of experiments, viva, and record are the average of all the specified experiments in the syllabus.

## **Evaluation Pattern for End Semester Examination (50 Marks)**

#### 1. Procedure/Preliminary Work/Design/Algorithm (10 Marks)

- Procedure Understanding and Description: Clarity in explaining the procedure and understanding each step involved.
- Preliminary Work and Planning: Thoroughness in planning and organizing materials/equipment.
- Algorithm Development: Correctness and efficiency of the algorithm related to the experiment.

• Creativity and logic in algorithm or experimental design.

#### 2. Conduct of Experiment/Execution of Work/Programming (15 Marks)

• Setup and Execution: Proper setup and accurate execution of the experiment or programming task.

#### 3. Result with Valid Inference/Quality of Output (10 Marks)

- Accuracy of Results: Precision and correctness of the obtained results.
- Analysis and Interpretation: Validity of inferences drawn from the experiment or quality of program output.

#### 4. Viva Voce (10 Marks)

- Ability to explain the experiment, procedure results and answer related questions
- Proficiency in answering questions related to theoretical and practical aspects of the subject.

#### 5. Record (5 Marks)

• Completeness, clarity, and accuracy of the lab record submitted
